REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

A review of Applicant's arguments in the Papers filed 5/5/2011 and 5/2/2011 and a review of the instant claims has convinced the examiner that the claims are allowable over the applied prior art of record.

2. Regarding independent claim 1 and the dependent claim, the prior art fails to teach or suggest a foamable water-in-oil type emulsion in combination with an aerosol container, wherein the emulsion comprises an emulsifier in the amount of 0.5 to 6.0 wt% based on the emulsion; wherein the water-in-oil emulsion in the container prior to jetting is a liquid or gel; wherein the oil in the water-in-oil type emulsion is an edible oil which has a cloud point (ASTM) of about 4.4°C (40 °F) or lower, the container comprises a gas propellant partially dissolved in said water-in-oil emulsion; the container has a discharging nozzle for discharging the emulsion with the gas propellant as a mousse form therefrom; the mousse is formed at the time of jetting; and wherein the emulsifier consists of at least one member selected from the group consisting of monoglycerin fatty acid ester, sucrose fatty acid ester, sorbitan fatty acid ester, and polysorbate, and wherein the monoglycerin fatty acid ester, if included, is in the range 2.5-3.0 parts by weight based on the emulsion.

3. The closest prior art of Gupta (US 2003/0019888) teaches a dispensing container including an upper product chamber, lower propellant chamber and dispensing nozzle wherein the upper product chamber can include water-in-oil emulsions (no mention of a propellant being in the upper product chamber or the

Art Unit: 1783

emulsion being edible). The product can be a paint or cleaning products or other materials, however, fails to teach wherein the emulsion is a liquid or gel prior to dispensing; wherein the emulsion comprises an emulsifier in the amount of 0.5 to 6.0 wt% based on the emulsion; wherein the oil in the water-in-oil type emulsion is an edible oil which has a cloud point (ASTM) of about 4.4 °C (40 °F) or lower, the container comprises a gas propellant partially dissolved in said water-in-oil emulsion, wherein the emulsifier is at least one member selected from the group consisting of monoglycerin fatty acid ester, sucrose fatty acid ester, sorbitan fatty acid ester, and polysorbate and wherein the monoglycerin fatty acid ester, if included, is in the range 2.5-3.0 parts by weight based on the emulsion. It does not make sense to dissolve propellant into the top product compartment as claimed as this would defeat the purpose of having a separate propellant chamber at the bottom. If propellant was dissolved in the product then it would not be necessary to have a separate propellant chamber. Gupta does mention that a foam can be present in the upper chamber, however, does not state whether this foam is a water-in-oil emulsion or a food or a liquid or gel that can be jetted as an edible mousse. Since the emulsion in Applicant's claimed container is either a liquid or a gel it has the advantage of providing a significantly greater mass of product in the container than a container that contains foam which includes gaseous material that is not liquid or gel. Most oil emulsions known in the oil art are oil-in-water emulsions and not water-in-oil emulsions as claimed as water-in-oil emulsions are known to have functional and safety problems. Applicant explains the known problems with water-in-oil emulsions at pages 1-5 of the Application as filed. The specific claimed formulation in

Art Unit: 1783

combination with the claimed aerosol container is effective and overcomes the problems with different known formulations/containers as made of record.

4. The secondary references of record do not teach or suggest the combined limitations not taught by Gupta (US 2003/0019888).

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
